### **SUBJECT:- WEB DESIGNING**

# Chapter - 1 Intro to AJAX

Asynchronous JavaScript and XML

#### WHAT IS AJAX?

AJAX is a Technology to send and retrieve data from the server in background.

#### **HOW DOES AJAX WORK?**

- 1. Create http request object in xml R EDUCATION
- 2. send http request on server
- 3. server process the request and create response then send back to the browser.

\*

- 4. receive response on browser with the help of java script
- 5. update page content on browser

## **REQUEST STATE**

- 0: request under process
- 1: connection established with server
- 2 : request received on server
- 3: server is processing your request
- 4: response is created and ready to send
